

TACTICAL COMBAT CASUALTY CARE (TCCC)

Tactical Combat Casualty Care (TCCC) is created by the U.S. Department of Defense, Defense Health Agency, Joint Trauma System to teach evidence-based, life-saving techniques and strategies for providing the best trauma care on the battlefield.

The medical science upon which TCCC is based is published in NAEMT's PHTLS Military textbook; the military chapters are written

by members of the Joint Trauma System Committee on TCCC. The TCCC course offered by NAEMT is the only TCCC course endorsed by the Joint Trauma System and

the American College of Surgeons. NAEMT's TCCC courses are accredited by CAPCE and recognized by NREMT.

Upon successful completion, students receive a certificate of completion and a wallet card recognizing them as a TCCC provider for 3 years.

NAEMT conducts TCCC courses as specified by the JTS TCCC guidelines and curriculum. The JTS is in the process of revising all TCCC courses. For the latest information on these courses, please visit naemt.org/education/naemt-tccc.
